

# ***Liberals 35, Conservatives 33, NDP 15, Greens 9, BQ 5, PPC 1***

*Nightly Tracking, three day rolling average ending October 10<sup>th</sup>, 2019*  
*Released October 11<sup>th</sup>, 2019*

**“ Voters remain gripped by indecision between Liberals and Conservatives. Trudeau ahead of Scheer by 6 points as preferred PM but Singh trending up as third.”**

**Nik Nanos**

# NATIONAL BALLOT

A national dual-frame (land+cell) random telephone survey is conducted nightly by Nanos Research throughout the campaign using live agents. Each evening a new group of 400 eligible voters are interviewed. The daily tracking figures are based on a three-day rolling sample comprised of 1,200 interviews. To update the tracking a new day of interviewing is added and the oldest day dropped. The margin of error for a survey of 1,200 respondents is  $\pm 2.8$  percentage points, 19 times out of 20.

# SURVEY METHODOLOGY

A national random telephone survey of 1,200 Canadians is conducted by Nanos Research throughout the campaign over a three day period. Each evening a new group of 400 eligible voters are interviewed. The daily tracking figures are based on a three-day rolling sample comprised of 1,200 interviews. To update the tracking a new day of interviewing is added and the oldest day dropped. The margin of error for a survey of 1,200 respondents is  $\pm 2.8$  percentage points, 19 times out of 20.

The respondent sample is stratified geographically and by gender. The data may be weighted by age according to data from the 2016 Canadian Census administered by Statistics Canada. Percentages reported may not add up to 100 due to rounding.

# TECHNICAL NOTE

Element	Description
Research sponsor	CTV/Globe and Mail/Nanos Research
Population and Final Sample Size	1,200 Randomly selected individuals; three night rolling average of 400 voters a night; closing weekend oversample. The interviews are compiled into a three day rolling average of 1,200 interviews, where each week the oldest group of 400 interviews is dropped and a new group of 400 interviews is added.
Source of Sample	Dynata
Type of Sample	Probability
Margin of Error	±2.8 percentage points, 19 times out of 20.
Mode of Survey	Tracking; RDD dual frame (land- and cell-lines) random telephone survey.
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.
Demographics (Other)	Age, gender, education, income
Fieldwork/Validation	Live CATI interviews with live supervision to validate work.
Number of Calls	Maximum of five call backs.
Time of Calls	Individuals were called between 6:30-9:30pm local time for the respondent.
Field Dates	October 8 to 10, 2019.
Language of Survey	The survey was conducted in both English and French.
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. <a href="https://canadianresearchinsightscouncil.ca/standards/">https://canadianresearchinsightscouncil.ca/standards/</a>

Element	Description
Weighting of Data	The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure
Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell lines could not participate.
Stratification	By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Estimated Response Rate	7 percent, consistent with industry norms.
Question Order	An open-ended national issue of concern question and party vote consideration questions are asked ahead of the ballot question.
Question Content	Decided voters include individuals who reported as leaning in their preferences.
Question Wording	The question in the preceding report was written exactly as they were asked to individuals.
